COMMUNITY WORKSHOP 5

MEETING REPORT

UC Merced and Cultiva La Salud – COMMUNITY AND TRAINING CORES

NICOTINE & CANNABIS POLICY CENTER | 5200 N. LAKE ROAD,
MERCED, 95340

Primer Congreso Valle Central de Tabaco: DALE LUZ A LA SALUD, NO AL CIGARRO

Event Title: NCPC/Cultiva La Salud Primer Congreso Valle Central de Tabaco: DALE LUZ A LA SALUD, NO AL CIGARRO

Location: 5200 North Lake Rd. Merced, CA 95343

Date: June 24th, 2023

Meeting Agenda (Appendix A):

Morning Session:

- 10:00am - Arrival and Introductions
- 10:15am - Cultiva La Salud: The Importance of the Promotoras
- 10:40am - Promoting a Center Focused on Health and Anti-Tobacco Policy in the San Joaquin Valley
- 11:20am - Break out into groups
- 11:30am - Games & Group Art Activities for Children
- 11:30am - Building Positive Parent-Child Relationships: Part I
- 11:30am - Stem Cells & the Art of Origami: Cellular Plasticity and Unlimited Potential
- 12:20pm - Lunch & Bathroom Break

Afternoon Session:

- 1:00pm - Building Positive Parent-Child Relationships: Part II
- 1:00pm - Big Tobacco Targeting a New Generation: Youth
- 2:00pm - End of Day Discussion & Farewells

Speakers: Arturo Durazo, PhD; Claudia Corchado, Anabel Serna, Cultiva La Salud Promotoras, Mayra Bámaca, PhD; Marcos García-Ojeda, PhD; Celeste Ramos, and Sauci Xiong

Primer Congreso Valle Central de Tabaco: DALE LUZ A LA SALUD, NO AL CIGARRO

Promoting a Center Focused on Health and Anti-Tobacco Policy in the San Joaquin Valley

- In his Spanish-led presentation, Dr. Arturo Durazo discussed the NCPC's focus on health and anti-tobacco policies in the San Joaquin Valley (*Appendix B*).

1. Tobacco and nicotine products

- Tobacco or nicotine products can be:
 - Smoked
 - Chewed
 - Snorted
 - Inhaled from tobacco vapor

2. How does nicotine work in the body?

1. It is found naturally in tobacco
2. It is absorbed through the lungs and reaches the tissues.
3. In the brain, it releases dopamine and other neurotransmitters.
4. It is addictive and not risk-free.

- **The Importance of Developing and Implementing the Nicotine & Cannabis Policy Center at UC Merced**

1. Tobacco is still an issue

- Smoking is still the largest cause of preventable deaths
 - 1 out of 5 deaths are due to smoking
 - 1,300 people die from smoking every day
- Smoking costs \$300 billion each year (in the United States)
 - Medical care for adults due to smoking-related disease
 - Lost productivity due to disease and death due to secondhand smoke (SHS)
- 1 in 5 Latinas/os smokes cigarettes
- 4 out of 5 smokers regret smoking
- 7 out of 10 smokers want to quit smoking
- Every day, 3,200 young people start using tobacco
 - The onset of tobacco use is between 10 and 12 years of age
 - Many start out of curiosity or imitation
 - Among Latina/o high school students:
 - 1 in 5 use any kind of tobacco or nicotine product
 - 4% smoke
 - 23% use electronic cigarettes

Primer Congreso Valle Central de Tabaco: DALE LUZ A LA SALUD, NO AL CIGARRO

2. In our region, tobacco is a problem

- Globally, California leads the way in smoke-free and tobacco control policies
 - California led the charge for smoke-free laws and taxation
 - California is the state with the lowest smoking rate compared to the United States
- Despite being in California, our region is behind
 - The state prevalence of adult smokers is 9% (2020)
 - The smoking rates in our region are 16%-20%
 - On par with states like Alabama and Georgia, where rates are the highest
 - 60% of rural young men smoked in the past 30 days

3. What are the counties in our region?

- The NCPC Catchment Area
 - The NCPC is based in Merced, but investigations are conducted in **11 counties** in the San Joaquin Valley (SJV).
 - San Joaquin, Calaveras, Stanislaus, Tuolumne, Merced, Mariposa, Madera, Fresno, Kings, Tulare, and Kern
- The 11 counties are home to more than 4 million people and includes some of California's poorest counties and populations.
- With statewide smoking rates reaching 10% in 2020, disparities in tobacco control implementation in California have resulted in adult smoking rates of 16% in the SJV, with rates reaching 19% in Fresno and 20% in Tuolumne, Calaveras, and Mariposa.

4. What about cannabis?

- Proposition 64 drastically changed the policy landscape for marijuana
 - Recreational use is legal, but it remains restrictive
 - Do people understand the risks involved with cannabis use?
 - Do people know and/or support cannabis policies and restrictions?
 - What is the intersection between tobacco and cannabis?
 - Will the increase in cannabis use have an impact on tobacco use?
- NOTE: The NCPC is examining nicotine and cannabis policy. It does not research any plants, extracts or their physical and mental effects.

Primer Congreso Valle Central de Tabaco: DALE LUZ A LA SALUD, NO AL CIGARRO

5. Are there challenges with tobacco control?

- Historically, tobacco control has been difficult in the San Joaquin Valley and the local Sierras
 - The severe lack of infrastructure, unequal policy enforcement, and lack of support for anti-smoking policies among the population has created gaps in tobacco and cannabis control effectiveness.
 - SJV localities have failed to effectively implement regulations on emerging tobacco control issues, including regulations of nicotine products such as e-cigarettes.
 - The legalization of cannabis also poses a major policy enforcement issue in the heavily agricultural area, where cannabis is perceived as a potential cash crop.

6. Why is more data needed?

- The San Joaquin Valley (SJV) and the local Sierras have been largely overlooked and neglected
 - The SJV contains many ethnically diverse and under served groups with numerous health problems, including tobacco-related diseases, and yet very little data exists on the region.
 - More knowledge about whether people support tobacco and cannabis control ordinances and regulations will help determine when to develop policies that might be advantageous, where gaps in enforcement occur, and how tobacco control measures might best be communicated to the public.
 - The SJV has also been prone to non-regional researchers who have conducted in the area, only to make those efforts short-lived, without long lasting benefits.
- UC Merced and NCPC are dedicated, over the long term, to community outreach, research, and tobacco control policy to improve the health of San Joaquin Valley residents.

Primer Congreso Valle Central de Tabaco: DALE LUZ A LA SALUD, NO AL CIGARRO

Big Tobacco Targeting a New Generation: Youth

- ◇ From California Health Collaborative, Celeste Ramos, Project Coordinator of Unidos Por Salud Program and Sauci Xiong, Project Coordinator of API PACT Program, presented on the tobacco industries' marketing strategies that motivate youth to become their new tobacco and nicotine products consumers (*Appendix C*).

1. Meet the facilitators!

- Celeste Ramos
 - Project Coordinator
 - Unidos Por Salud Program
- Sauci Xiong
 - Project Coordinator
 - Asian Pacific Islander Partners and Advocates Countering Tobacco (API PACT) Program

2. California Health Collaborative (CHC) Mission Statement

- With a mission of changing lives by improving health and wellness, the California Health Collaborative (CHC) was founded in 1982 as a nonprofit public corporation under code 501 (C) 3.
- API PACT and Unidos Por Salud are tasked with reducing tobacco-related health disparities and improving health equity among Asian and Pacific Islander (API) and Latinx populations in the Central Valley.

3. Icebreaker

- Using your whiteboards, share...
 1. Where you are from?
 2. Your favorite sweet treat
 3. What are you looking forward to during the summer?
- Traditional Tobacco and Commercial Tobacco
- Traditional Tobacco
 - Tobacco grown or harvested and used by American Indian Nations for ceremonial or medicinal purposes.
- Commercial Tobacco
 - Tobacco marketed for profit.

Primer Congreso Valle Central de Tabaco: DALE LUZ A LA SALUD, NO AL CIGARRO

5. Marketing to Youth & Young Adults

- When smokers started dying, tobacco companies needed replacement smokers.

6. Secret Reports

- "Hitting the youth can be more efficient even though the cost to reach them is higher, because they are willing to experiment, they have more influence over others in their age group than they will later in life, and they are far more loyal to their starting brand."
A Phillip Morris Executive, 195757
- "Attract young smoker to replace the older ones who were dying or quitting ... I was part of a scam, selling an image to young boys. My job was to get half a million kids to smoke by 1995."
Lead model for Reynolds for 7 years, 1992

7. Targeting a New Generation: Youth

- Through modern smoking devices flavored tobacco, cheap prices, colorful packaging and their favorite artists influencers.

8. Tobacco Use Among Youth

- Overall, nearly 1 in 6 (14.9%), Hispanic high school students are current users of any tobacco product.
- Vapes were the most common tobacco product used among California high school youth in 2022.

9. What is vaping?

- Vaping stimulates smoking.
- Vaping creates an aerosol that is inhaled into the lungs where nicotine and chemicals cross over into the bloodstream.

10. Nicotine = Brain Poison

- Some tobacco products are designed to deliver nicotine to the brain within seconds.
- Modern vaping devices have as much as 6x the nicotine concentration of first generation e-cigarettes.

Primer Congreso Valle Central de Tabaco: DALE LUZ A LA SALUD, NO AL CIGARRO

11. Know the Risks of Vaping

- Brain Development
 - Nicotine products can rewire the teen brain to crave more of the substance.
- Dependence & Behavior
 - Nicotine use can lead to regular use of tobacco products, resulting in long-term exposure to toxic chemicals and long-lasting health effects.
- Aerosol & Other Chemicals
 - E-cigarettes contain nicotine, ultra fine particles, heavy metals, and volatile organic compounds.

12. Nicotine Use in Young Adults Can Worsen...

- Anxiety
- Irritability
- Impulsivity
- Decision-making
- Increased risk of dependence to other substances

13. Vaping Resources Available for Youth

- Kick It California: Text NOVAPES to 66819
- Text DITCHJUUL to 88709 88709
- Text START MY QUIT to 1-855-891-998989
- National Cancer Institute

14. Become a Youth Advocate

- Is there a health club in your school?
- What changes do you want to see in your community to protect your peers from tobacco?
- Take a stand for your community!

15. Ways to Bring Awareness to Your Community

- Earth Day: April 22nd
- World No Tobacco Day: May 31st
- Red Ribbon Week: October
- The Great American Smoke Out: November

16. Head, Heart, Feet

- What did you learn today?
- How did it make you feel?
- What will you do now?

Primer Congreso Valle Central de Tabaco: DALE LUZ A LA SALUD, NO AL CIGARRO

Press Release

- Prior to the day of the event, the summit received news coverage from the newspaper Vida en el Valle, a part of The Fresno Bee, and was reported by María G. Ortiz-Briones (*Appendix D*).
 - *Families invited to UC Merced to an event on the dangers of smoking this Saturday, June 24*
- The UC Merced Nicotine and Cannabis Policy Center (NCPC) and Cultiva La Salud Merced County invite families from the surrounding area to a free Spanish-language event at UC Merced on Saturday, June 24th to discuss the dangers of smoking.
- The event, scheduled from 10AM to 2PM, will begin with a welcome message by Claudia Corchado, director of Cultiva La Salud and Dr. Arturo Durazo, Interim NCPC Director, HSRI Community Engaged Scientist, in the Dr. Lakireddy Auditorium, followed by several workshops in Student Services Building.
- Workshops for parents will include discussions on the health effects of vaping, possible policies to protect children, and more.
- Teens and young children will also have the opportunity to attend their own workshops.
- Information about the university will be available along with giveaways. Free lunch will also be provided.
- The quota is limited. Families interested in attending must register online: <https://ucm.edu/iRYCnl>.

EVENTOS

Financiación de eventos y fiestas para promocionar productos de tabaco.

Productos de tabaco o nicotina

Los productos de tabaco o nicotina se pueden:

- Fumar
- Masticar
- Aspirar
- Inhalar el vapor del tabaco

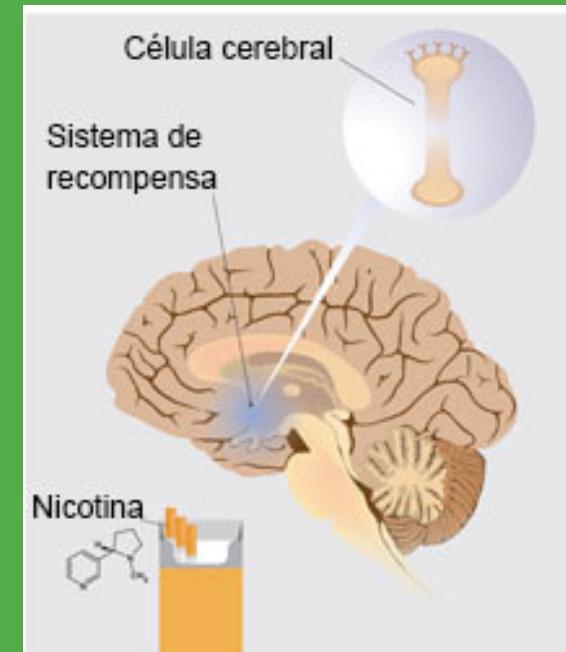

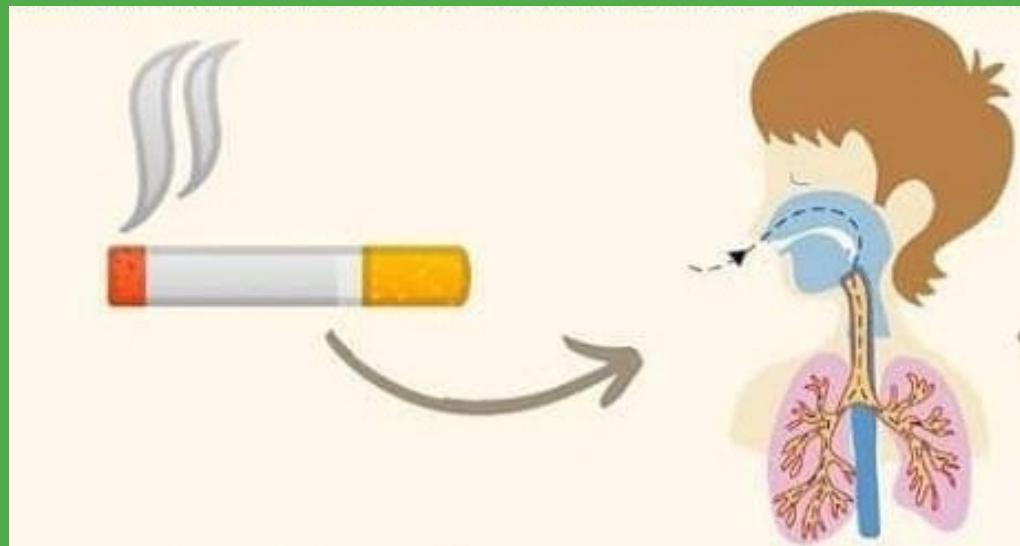

¿Cómo actúa la nicotina en el cuerpo?

Se encuentra naturalmente en el tabaco

Se absorbe a través de los pulmones y llega hasta los tejidos

En el cerebro, libera dopamina y otros neurotransmisores

Es adictiva y no está libre de riesgos

Cuando se fuma, la nicotina activa las células que se encuentran en el sistema de recompensa del cerebro.

LA IMPORTANCIA DE DESARROLLAR E IMPLEMENTAR EL *NICOTINE & CANNABIS POLICY CENTER* EN UC MERCED

NICOTINE & CANNABIS POLICY CENTER

Soluciones basadas en la evidencia y ciencia

El Tabaco Sigue Siendo Un Problema

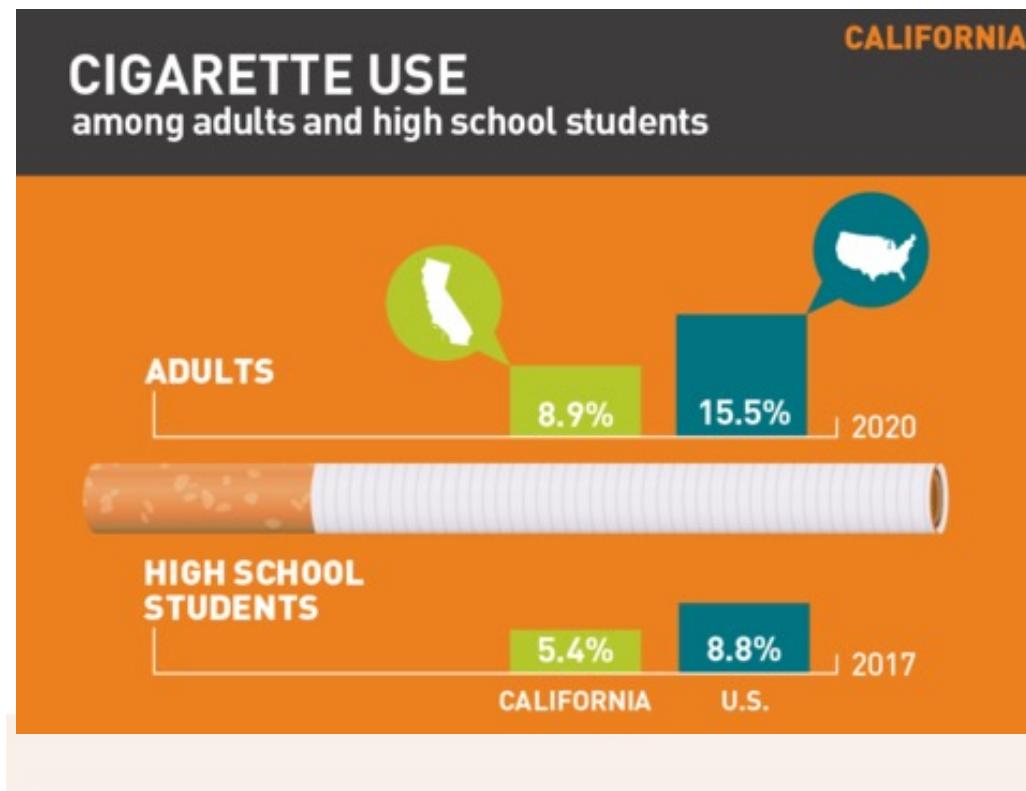

- ❖ El fumar tabaco sigue siendo la principal causa de muertes evitables
 - De 1 de cada 5 muertes son debido al fumar
 - Son 1,300 personas que mueren diariamente debido al tabaco
- ❖ El fumar cuesta 300 mil millones de dólares al año (🇺🇸)
 - A base de la atención médica debido a las enfermedades causadas por el tabaquismo
 - Pérdida de productividad debido a las enfermedades y muerte a causa del humo de segunda mano

El tabaco sigue siendo un problema

- ◊ De 1 de cada 5 latinas/os fuma cigarrillos
- ◊ De 4 de cada 5 fumadores lamentan fumar
- ◊ De 7 de cada 10 fumadores quieren abandonar el hábito de fumar
- ◊ Diariamente, 3,200 jóvenes inician el consumo de tabaco
 - ◊ Inicio de consumo de tabaco es entre 10 y 12 años de edad
 - ◊ Muchos comienzan por curiosidad o por imitación
 - ◊ Entre estudiantes latinas/os de secundaria:
 - ◊ De 1 de cada 5 usan cualquier producto de tabaco y nicotina
 - ◊ El 4% fuman
 - ◊ El 23% usan cigarrillos electrónicos

En nuestra región, el tabaco es un problema

- ❖ Al nivel mundial, CA lleva la batuta en las políticas antitabaco y el control del tabaco
 - CA lideró el cargo de leyes e impuestos libres de humo
 - Estado con la tasa de fumar más baja comparada a 🇺🇸

En nuestra región, el tabaco es un problema

- ◊ Al nivel mundial, CA lleva la batuta en las políticas antitabaco y el control del tabaco
 - CA lideró el cargo de leyes e impuestos libres de humo
 - Estado con la tasa de fumar más baja comparada a 
- ◊ A pesar de estar en CA, nuestra región va atrasada
 - La prevalencia estatal de fumadores adultos es 9% (2020)
 - Las tasas de tabaquismo en nuestra región son de 16%-20%
 - En pie de igualdad con Alabama and Georgia donde las son las más altas
 - El 60% de los varones jóvenes rurales fumaron en los últimos 30 días

Nicotine and cannabis policy center established at UC Merced

UC MERCED-COURTESY Anna Song, director of the UC Nicotine and Cannabis Policy Center and professor of health psychology

By WOODLAND DAILY DEMOCRAT |

PUBLISHED: July 24, 2018 at 12:00 a.m. | UPDATED: August 30, 2018 at 12:00 a.m.

UC Merced has been awarded a \$3.8 million grant to establish the UC Nicotine and Cannabis Policy Center (NCPC), positioning UC Merced and the San Joaquin Valley region as a leading center for the study of public health and policy matters related to tobacco and marijuana.

¿Cuales son los condados?

ÁREA DE CAPACITACIÓN

- El NCPC esta basado en Merced, pero las investigaciones se llevan a cabo en **11 condados** del Valle de San Joaquín (VSJ).

San Joaquin / Calaveras / Stanislaus / Tuolumne / Merced / Mariposa / Madera / Fresno / Kings / Tulare / Kern

- Los 11 condados albergan a más de 4 millones de personas, la región incluye algunos de los condados y poblaciones más pobres de California.
- Con tasas de tabaquismo estatal que alcanzaron el 10% en 2020, las disparidades en la implementación del control del tabaco en CA han resultado en tasas de tabaquismo en adultos del 16% en el VSJ, con tasas que llegan al 19% en Fresno y 20% en Tuolumne, Calaveras y Mariposa.

Y el cannabis, ¿qué tal?

◆ La Proposición 64 cambio drásticamente el panorama político

- El uso recreativo es legal, pero sigue siendo restrictivo
- ¿Entienden las personas los riesgos que implica el consumo de cannabis?
- ¿Conocen y apoyan las personas las restricciones de cannabis?
- ¿Cuál es la intersección entre el tabaco y el cannabis?
- ¿El aumento de su consumo impactará en el tabaquismo?

NOTA: El NCPC examina la política de nicotina y cannabis. NCPC no investiga la planta, los extractos y sus efectos físicos y mentales.

¿Hay retos con el control del tabaco?

1

Históricamente, el control del tabaco a sido difícil en el Valle de San Joaquín y en las Sierras Locales

- ◊ La grave falta de infraestructura, la aplicación desigual de las políticas y la falta de apoyo de las política contra el tabaquismo entre la población ha creado fallas en la eficacia del control del tabaco y el cannabis.
- ◊ Las localidades de SJV no han implementado de una manera efectiva las regulaciones sobre los problemas emergentes de control del tabaco, incluidas las regulaciones de productos de nicotina como los cigarrillos electrónicos.
- ◊ La legalización del cannabis también plantea un problema importante de aplicación de políticas en el área fuertemente agrícola, donde el cannabis se percibe como un cultivo comercial que generará ingresos.

¿Por qué se necesitan más datos?

2

El Valle de San Joaquín (VSJ) y las Sierra locales han sido en gran parte pasados por alto y desatendidos

- El SJV contiene muchos grupos étnicamente diversos y desatendidos con numerosos problemas de salud, incluidas enfermedades relacionadas con el tabaco y, sin embargo, existen muy pocos datos sobre la región.
- Más conocimiento sobre si las personas apoyan las ordenanzas y regulaciones de control del tabaco y cannabis ayudarán a determinar cuándo desarrollar política publica que puede ser ventajosa, dónde se encuentre fallas en su realización y cuál es la mejor manera de comunicar al público las estrategias para el control del tabaco.
- El SJV también ha sido propenso a investigadores fuera de la región y que han realizado investigaciones en el área, solo para que esos esfuerzos sean de corta duración, sin beneficios duraderos.

UC Merced y NCPC están dedicados, a largo plazo, a la vinculación con la comunidad, a la investigación y a la política contra el tabaquismo para el mejoramiento de la salud de los residentes del Valle de San Joaquín.

According to repeated nationwide surveys,

More Doctors Smoke CAMELS than any other cigarette!

Doctors in every branch of medicine were asked, "What cigarette do you smoke?" The brand named most was Camel!

You'll enjoy Camels for the same reasons so many doctors enjoy them. Camels have cool, cool mildness, pack after pack, and a flavor unmatched by any other cigarette. Make this sensible test: Smoke only Camels for 30 days and see how well Camels please your taste, how well they suit your throat as your steady smoke. You'll see how enjoyable a cigarette can be!

THE DOCTORS' CHOICE IS AMERICA'S CHOICE!

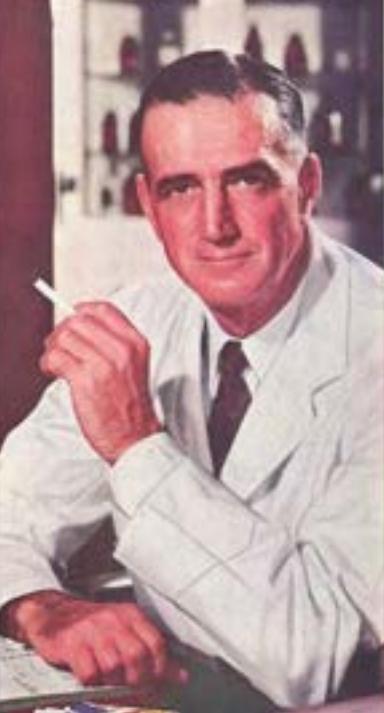

MARY STONE says: "I pack Camels. They agree with my throat and taste wonderful!"

JOE BROWN says: "I get more pleasure from Camels than from any other brand."

EDWIN BELLAMY says: "Camels suit my taste and throat. I've smoked 'em for years!"

For 30 days, test Camels in your "T-Zone" (T for Throat, T for Taste).

MERCED

El [Centro de Políticas de Nicotina y Cannabis de UC Merced \(NCPC\)](#) y [Cultiva La Salud Merced County](#) invitan a las familias del área a un evento gratuito en español en UC Merced el sábado 24 de junio para hablar sobre los peligros de fumar.

El evento, programado de las 10 a.m. a las 2 p.m., dará inicio con un mensaje de bienvenida por Claudia Corchado, directora de Cultiva La Salud y el Dr. Arturo Durazo, director Interino NCPC, Científico Comprometido con la Comunidad HSRI en el Auditorio Dr. Lakireddy, seguido de varios talleres en el edificio de servicios estudiantiles.

Las sesiones de trabajo para padres incluirán debates sobre efectos del vapeo en la salud, las posibles políticas para proteger a los niños y más.

Los adolescentes y niños pequeños también tendrán la oportunidad de asistir a sus propios talleres.

Habrá información disponible sobre la universidad junto con obsequios. También se proporcionará almuerzo gratis.

El cupo es limitado. Las familias interesadas en asistir deben registrarse en línea:
<https://ucm.edu/iRYCnl>
